

A close-up photograph of a vibrant green leaf with a prominent water droplet on its surface. The leaf's texture is clearly visible, and the droplet reflects light, creating a bright starburst effect.

# ENABLING SUSTAINABLE VALUE

CONSULTING · INVESTMENT · TECHNOLOGY

# Sustainability Consulting

Discover the long term value and benefits of investing in sustainable businesses.

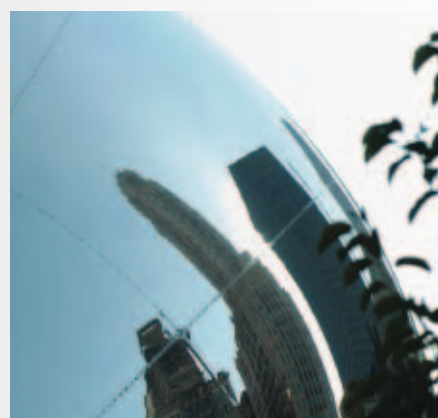

## Research, analyse and compare

SustainAsia provides research and benchmarks to ethical and responsible investors, industry leaders and corporations on the environmental, social and governance (ESG) performance of their portfolio of assets.

## Plan, measure, motivate and communicate

SustainAsia assists corporations in the strategy, management, disclosure and assurance of their sustainability performance, stakeholders engagement and sustainability report.

# Investment Advisory

Accelerate the transition to knowledge based products and services that optimize the use of natural resources, reduce ecological impact and add economic value.

## Innovate and accelerate

SustainAsia selects and assists high-potential technology and service companies in the clean & green technology and eco-efficiency sectors to accelerate their growth in the Asia Pacific region.

## Research, evaluate, execute and exit

SustainAsia advises financial services and investment groups on investment risks and opportunities in clean & green technology, energy and environmental infrastructure in the Asia Pacific region.

As a technology and industry expert, SustainAsia provides research and transaction services for the independent assessment and due diligence of targeted companies during private equity investment and merger & acquisition transactions.

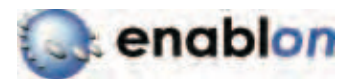

# Enabling Technologies

Integrated Information and Communication technologies are a source of long term competitive advantage to ensure full transparency, reliability and optimization of your assets

## Manage governance, risk and compliance

Enablon, one of the world's leading provider of corporate responsibility (CR), environment, health and safety (EHS) compliance, enterprise risk management (ERM), governance and legal management, is our IT partner. Together with Enablon, we provide integrated solutions for the management and reporting of governance, risk and compliance (GRC) across all industry sectors.

## Monitor and optimize

Greenware Technologies, a joint venture between SustainAsia and the Fargo Group, provides the next generation end-to-end wireless intelligent monitoring solutions, allowing real time detection, integration and monitoring of remote assets for material and resources efficiency, optimization, security, safety and tracking.

These solutions add sustained value to our clients in a broad range of applications ranging from: renewable energy and utilities, energy and water resources management, green infrastructure and buildings, supply chain management, diagnostics & maintenance.

**SustainAsia** is a corporate sustainability and clean & green technologies investment advisory firm operating in the Asia Pacific markets. Since 2004, SustainAsia provides advisory services, expertise and tools to high performance companies and investors seeking to enhance their long term economic performance while minimizing their environmental impact.

SustainAsia is the Asia Pacific partner of Enablon, a global leader of governance, risks and compliance IT solutions. SustainAsia is the Joint Venture partner in Greenware Technologies, a provider of intelligent remote monitoring solutions.

SustainAsia provides independent expertise on cleantech & greentech investments as well as environmental and energy infrastructure projects in Asia Pacific, assessing risks and opportunities, as well as participating in the due diligence of private equity investments, project financing or merger and acquisition transactions.
